GLASS MULTI-END ROVINGS FOR SMC

ME1975 ROVING FOR LOW DENSITY CLASS A SMC
- Helps redefine surface appearance
- Excellent for vertical surfaces that can result in less rework

P204 ROVING FOR GENERAL PURPOSE INCLUDING TRANSPORTATION
- Outstanding impregnation from 10 to 50% glass content
- Allows reduced glass changeovers for making multiple parts

973 ROVING FOR CLASS A & SEMI-STRUCTURAL PARTS
- Good surface quality for low profile automotive and heavy truck Class A
- Good processability

985 ROVING IDEAL FOR DOORS
- Good flow of glass allows for complex decorative contours
- High impact resistance

ME1960 ROVING FOR AESTHETICS, STRENGTH & COMPLEX SHAPE NEEDS
- Outstanding impregnation at high glass content up to 65%
- White color very suitable for pigmented parts

KEYS PRODUCT BENEFITS
- Helps redefine surface appearance
- Excellent for vertical surfaces that can result in less rework
- Outstanding impregnation from 10 to 50% glass content
- Allows reduced glass changeovers for making multiple parts
- Good surface quality for low profile automotive and heavy truck Class A
- Good processability
- Good flow of glass allows for complex decorative contours
- High impact resistance

| **Key:** | ++++ Excellent | +++ Very good | ++ Good | + Fair | – No data available |

SMC all rovings compatible with polyester and vinyl ester, most can work with polyurethane (fibers are 12 -16 micron diameter, rovings available as 2400, 4500 or 4800 Tex).

These are general guidelines based upon observations of overall market use. Users should note that performance is very dependent upon the resin/fiber formulation as well as the choice of roving.
