4066 multi-end roving represents an ideal solution for demanding applications requiring high quality surface finish in continuous sheet production.

- Produced with patented Advantex® corrosion resistance E-CR glass by Owens Corning.
- Compatible with unsaturated polyester resins.

FOR DEMANDING CONTINUOUS SHEET PRODUCTION APPLICATIONS

**Product Benefits**

**Efficient Processability**
- Easy unwinding and chopping, flat lay-down, and uniform dispersion with low fuzz and static.
- Easy choppability and splitting for excellent fiber distribution and laydown.

**Enhanced Performance**
- Better wet-out allows higher glass loading because of excellent wet-through and impregnation.
- Excellent fiber distribution for smooth surface aspect and consistent finish behind gel coat.

**Enhanced Service Life**
- Advantex® glass helps fight corrosion, enhancing service life compared to standard E-glass.

**Applications**

4066 glass reinforcement is designed to be chopped for the continuous production of recreational vehicle body parts.

Availability & Packaging
(Standard Reference)

Each pallet can be packaged in Creel-Pak™ or jumbo packaging format. Pallets are stretch-wrapped for load stability and for protection during transport. All individual packages are wrapped with Tack-Pak™ packaging to aid package run-out and transfer. More information is available in the Customer Acceptance Standards.

Labeling

Each doff has a self-adhesive identification label showing the product description, net weight, and production date. Each pallet has at least two identification labels detailing the product reference, pallet net and gross weights, production date, and pallet production code.

Storage

It is recommended to store glass fiber products in a cool, dry area. The glass fiber products must remain in their original packaging material until the point of usage; the product should be stored in the workshop, within its original packaging, 48 hours prior to its utilization, to allow it to reach the workshop temperature condition and prevent condensation, especially during cold season. The packaging is not waterproof. Be sure to protect the product from the weather and other sources of water. When stored properly, there is no known shelf life to the product, but retesting is advised after two years from the initial production date to insure optimum performance.
