OWENS CORNING®, PREFERRED BECAUSE IT PERFORMS.

OWENS CORNING® FIBERGLAS™ INSULATION IS THE BRAND INSTALLERS TRUST.

- THE CHOICE OF 2 OUT OF 3 INSTALLERS NATIONWIDE.
- RATED #1 FOR EASE OF INSTALLATION BY CONTRACTORS.
- RATED #1 BRAND IN THE BUILD MAGAZINE BRAND USE STUDY.
- THE BRAND NAME CONTRACTORS HAVE TRUSTED FOR 75 YEARS.
TWO OUT OF THREE PROFESSIONALS PREFER THE OWENS CORNING® BRAND.

Why? Because our products are engineered specifically to meet the contractors’ needs for performance, versatility and value.

Owens Corning® PINK® Fiberglas™ Insulation offers outstanding coverage, fast application and exceptional R-value per square inch when compared to other fiberglass insulation products. And, they’re rated #1 for handleability and ease of installation, too! Whether your job calls for loosefill insulation or batts and rolls, you can be sure Owens Corning® PINK® Fiberglas™ Insulation products will exceed your expectations.

Over the last 75 years, we made product improvements based on the feedback received from professionals out on the job. In fact, every major technological innovation we’ve introduced over the years, has been in response to you.

So choose the brand you know and the brand you can trust. Choose PINK®.
With its advanced Fiberizing Technology, Owens Corning® Loosefill Insulation allows you to do more in less time. On the job, it’s incredibly easy to work with. And once installed, it delivers exceptional thermal protection for years to come. For efficiency, cost-savings and performance, the choice is Owens Corning:

**EASY CODE COMPLIANCE**
Achieve verifiable R-value in the walls with the help of our exclusive Inspect-R® Gauge tool.

**INSTALLER COMFORT**
Owens Corning® products are designed to create less dust and less itch.

**IMPROVED PRODUCTIVITY**
Up to 15% reduction in blowing time when compared to other unbonded loosefill products.

**INCREDIBLE VERSATILITY**
One sku gets the job done. Certified for use in walls, attics, cathedral ceilings and walls.

**EXCEPTIONAL THERMAL PROTECTION**
Completely fills the cavity with virtually no settling and eliminates gaps that require additional handwork.

**WIND POWERED**
Owens Corning® Insulation products are first to be certified as made with 100% wind-powered electricity.

**ENVIRONMENTALLY SUSTAINABLE**
Certified 55% recycled content. Owens Corning® Loosefill Insulation is GreenGuard Gold Certified and validated to be formaldehyde-free.

**EXCEPTIONAL THERMAL PROTECTION**
Owens Corning® Insulation products are first to be certified as made with 100% wind-powered electricity.

**ENVIRONMENTALLY SUSTAINABLE**
Certified 55% recycled content. Owens Corning® Loosefill Insulation is GreenGuard Gold Certified and validated to be formaldehyde-free.

Owens Corning® formaldehyde-free insulation delivers reliable long-term performance. With excellent thermal and acoustical control, it’s a great choice for high-performing energy-efficient homes. Plus, Owens Corning® batts and rolls offer a wide range of features that enhance installer comfort and improve efficiencies on the job.

**LONG-TERM RELIABILITY**
Will not settle nor slump within wall cavities, ensuring years of exceptional performance.

**ON-THE-JOB EFFICIENCY**
Simple to cut and split, making it easy to properly insulate irregular cavities and around common obstructions.

**INSTALLER COMFORT**
With less dust than other fiberglass products, PINK® Fiberglas® Insulation has excellent stiffness and recovery characteristics.

**IMPROVED HANDLING**
Owens Corning’s unique compression packaging speeds job site handling and installation.

**LEED® CERTIFICATION**
Owens Corning® batts and rolls contribute to LEED® project certification.

**ENVIRONMENTALLY RESPONSIBLE**
GreenGuard Gold Certified, our product contains an average of 58% recycled content.

**WIND POWERED**
Owens Corning® Insulation products are first to be certified as made with 100% wind-powered electricity.

**OUTSTANDING PERFORMANCE**
Deliver excellent thermal and acoustical control.
