Essential Weatherproofing Barrier.

Tile and metal shingles are water-shedding not waterproofing barriers. WeatherLock® Specialty Tile & Metal underlayment provides the weatherproofing protection your home needs to help prevent leaks.

Extended UV exposure—Resists UV degradation when left exposed for up to 90 days.

Waterproofing barrier—Adheres to roof deck and seals around nails for dependable, water-tight construction.*

Peak performance—High puncture and tear-resistant surface.

Safe installation—Single-layer polyester walking surface provides a slip-resistant work area.

Added protection—Acts as a waterproof barrier in the most vulnerable sections of the roof to create a second line of defense. For optimal protection, apply to entire roof deck on 2:12 to 4:12 pitch roofs.***

30-year limited warranty—Since tile and metal shingles are water-shedding not waterproofing, rely on WeatherLock underlayment to provide a long-lasting roof system.**
The most important part of the roof?
All of them.

It takes more than just shingles to protect your home. It takes an integrated system of components and layers designed to withstand the forces of nature outside while controlling temperature and humidity inside. The Owens Corning™ Total Protection Roofing System™^ gives you the assurance that all of your Owens Corning™ roofing components are working together to help increase the performance of your roof — and to enhance the comfort and enjoyment of those who live beneath it.

Typical Values†
- Property: 2 sq. roll
- Length: 71.3 ft. (21.73 m)
- Width: 3 ft. (.91 m)
- Coverage: 196 sq. ft. (18.21 m²)
- Thickness: 65 mils

Applicable Standards and Codes
- ASTM D1970
- ASTM E108/UL 790 (Class A Fire Resistance)
- Florida Product Approval
- ICC-ESR 1783
- Miami-Dade County Product approval§

Physical Properties
- Property
  - Slip Resistance
  - Tile Slippage Resistance
  - Pliability
  - Tensile Strength
  - Elongation at Break (modified bitumen portion)
  - Permeance
  - Adhesion to Plywood, 40°F
  - Adhesion to Plywood, 75°F
  - Tear Resistance
  - Sealability around Nail
  - Low Temperature Flexibility
  - Waterproofing Integrity after Low Temperature Flex
  - Waterproofing Integrity of Lap
  - Thermal Stability
- Test Method
  - ASTM D1970
  - TAS 103
  - 1” Mandrel Bent at -20°F
  - ASTM D2523
  - ASTM D2523
  - ASTM E96
  - ASTM D903
  - ASTM D903
  - ASTM D4037
  - ASTM D1970
  - ASTM D1970
  - ASTM D1970
  - ASTM D1970
  - ASTM D1970

† All values are approximate.
§ Applies for all areas that recognize Miami-Dade County Product Control Section.

^ Excludes non-Owens Corning™ roofing products such as flashing, fasteners and wood decking.
* See actual warranty for complete details, limitations and requirements.
** Ensure proper ventilation is met when applied over the entire roof deck.
