The look that lasts.

Thick, ruggedly beautiful Woodcrest® Shingles are designed to enhance your home with the natural appearance and texture of wood shake but with greater durability and less maintenance. They also offer peace of mind by meeting the highest fire resistance standards in the industry. Best of all, Woodcrest® Shingles are available in a variety of distinctive color blends that are inspired by nature but not limited by it — giving your roof a pop of color you can’t get from real wood. In addition, the Woodcrest® offering includes COOL Roof Collection colors. These colors are specifically designed with solar-reflecting granules to help decrease the amount of heat transferred into a home. To add even more dimension and style to your home, be sure to pair your Woodcrest® Shingles with our color-matched Owens Corning® Hip & Ridge Shingles.

- Limited Lifetime Warranty* for as long as you own your home
- 110/130 MPH** Wind Resistance Limited Warranty*
- StreakGuard™ Protection with a 10-year Algae Resistance Limited Warranty*

Owens Corning®
COOL Roof Collection

In a premium offering of Woodcrest® Shingles, there are COOL Roof Collection colors that are specially designed to reflect the sun's rays, helping to make your home more comfortable and energy efficient. These deep, rich colors are unexpected for solar-reflecting shingles which are typically very light in color. Now you can save energy and look great at the same time.

Owens Corning® COOL Roof Collection

Cool Roof Requirements in California and Other Compliance Programs

Additional Features of COOL ROOF COLLECTION colors:

- Meet the prescriptive Cool Roof requirements of California Title 24, Part 6
- Are Cool Roof Rating Council (CRRC) rated
- Meet City of Los Angeles Cool Roof requirements
- Meet Property Assessed Clean Energy (PACE) financing program requirements
- May help lower household energy consumption by keeping the roof cooler; also may help decrease CO₂ emissions

How a roof reacts to heat from the sun.

The most important part of the roof?
All of them.

It takes more than just shingles to protect a home. It takes an integrated system of components and layers designed to withstand the forces of nature outside while controlling temperature and humidity inside. The Owens Corning® Total Protection Roofing System™ gives your customers the assurance that all of their Owens Corning® roofing components are working together to help increase the performance of the roof — and to enhance the comfort and enjoyment of those who live beneath it.
